Xperate

Working with Xperate

Unlocking potential through innovative solutions

2026

About Us

Unlocking potential through innovative solutions.

Xperate are an international software development company specialising in the legal sector. We offer everything from a full design and development consultancy service, through to short term projects, data services and consultant retention plans.

Our expertise lies in engineering and optimising software to seamlessly integrate.

If a solution doesn't exist, we'll build one.

Global Strength. Personal Touch.

Our Global Expertise

We have strategically expanded our presence across multiple continents to broaden our talent, maximise on specialised skills and achieve a truly global reach. With offices in Winchester (UK), Pune (India), Toronto (North America), and Melbourne (Australia), Xperate is positioned to deliver innovative software solutions and unparalleled support to law firms worldwide.

This global footprint enables Xperate to provide a round-the-clock service, adapt to local market needs and drive innovation by leveraging the strengths of its internationally diverse team.

Whilst Xperate operate on a global scale, it remains committed to fostering strong, close relationships with clients, offering tailored solutions.

A Flavour of Our Services

Our experience is far reaching. We work on small projects, right through to significant development projects that require large teams over several years. All firms come with different challenges and requirements, so we adapt our services to each situation.

What we do

- Integrations
- Bespoke software development
- Workflow design and management
- Case Management System development
- End to end data migration
- Development as a Service (DaaS)

How We Can Help

Essentially, we listen to your challenges or where you want to be operationally and we find the best route forward. Drawing on our expert knowledge, experience and innovative thinking, we find (or indeed create) the solution.

Integrations

We specialise in seamless integrations to help law firms streamline their operations by connecting various legal software, databases and thrid-party services. Whether it's integrating a case management system with accounting software, or linking client portals with document automation tools - we ensure secure, efficient, and scaleable connectivity.

Bespoke Software Development

Every law firm has unique operational needs, and off-the-shelf software often falls short of meeting specific requirements. Xperate offers bespoke development services, designing and building tailored solutions, often using APIs that align perfectly with a firm's workflows, compliance needs or client engagement. Whether its a custom built onboarding platform, a secure sharing portal or a specialised billing system, Xperate ensures that the software is robust, future-proof and optimised for your law firm.

Workflow Design and Management

Efficiency is key in legal practice, and Xperate helps law firms design and implement workflows that eliminate bottlenecks, automate routine tasks and enhance overall productivity. Our technical architects ensure that every workflow is intuitive and results-driven.

Practice & Case Management System Development

A reliable practice / case management system (PCMS) is the backbone of any law firm, helping legal professionals track cases, manage documents and collaborate efficiently. Xperate specialises in developing customised PCMS solutions tailored to the specific needs of law firms. Whether you need to develop your existing system, customise a new system you have invested in, or integrate a legacy practice management system - we are on hand to help you get the most of out of its capabilities. We also offer comprehensive implementation services for seamless integration and optimal performance.

Data Migration

Moving data from legacy systems to modern platforms can be complex, especially for law firms handling large amounts of sensitive client information. Xperate offers a comprehensive end-to-end data migration service, ensuring a smooth, secure and accurate transition without data loss or downtime. By using advanced migration strategies, data validation techniques and rigorous testing, our experts ensure that all case files, client records and documents are transferred efficiently while maintaining data integrity and regulatory compliance.

Development as a Service (DaaS)

Unlock your firm's potential with our DaaS service, offering flexible and demand-driven software development. Our adaptable model provides the right resources at the right time, eliminating the need for a full-time team. Scale up for major projects or access specialised expertise for short-term needs with our skilled developers. Experience the agility and efficiency of a service that grows with your firm, driving innovation and success.

Legal Specialists

We understand the challenges law firms face and we are passionate about helping law firms get the very best out of their tech.

Whether it is migrating from one system to another, investing in bespoke workflows and automations, or simply getting your various platforms to integrate, our tech architects have the understanding and technical skills to build bespoke solutions for your firm.

Many of our team have first-hand experience working in law firms, so they understand the language you speak and the tech frustrations that you face.

UK | India | North America | Asia-Pacific | Europe

Common Law Firm Challenges

"Our practice management system doesn't speak to our other tech tools and programs causing delays and duplication"

"We are falling behind our competitors due to speed and communication, but we don't know where to start with developing workflows or automations"

"Mergers and acquisitions have left us with legacy systems that require a large scale data migration project"

"We lack a central place for shared documents and file, meaning that time is wasted searching for files and duplicating exisiting documents."

Success Stories

Many of our clients value our discretion as we work on highly confidential project with them. Some projects that we are able to publicise are on our <u>website</u>.

KEYPOINT LAW

Xperate successfully delivered a major IT transformation for leading Australian law firm, Keypoint Law. The project united teams across the UK, India, and Australia to implement cutting-edge Practice and Document Management systems, both launching seamlessly. Xperate effectively became part of their firm throughout the journey, working closely with them to shape, lead, and deliver the new technology, culminating in a successful rollout to over 140 Keypoint users across six cities.

Levi Solicitors LLP

Xperate partnered with Levi Solicitors as they took the daunting step of switching to a new practice management system. While the software's native Outlook add-in already provides the ability to file emails and record time directly within Microsoft Outlook, Levi Solicitors sought additional automation to streamline this process further. Xperate developed a bespoke Outlook add-in that integrates with their new PMS meaning that fee-earners can time record and file emails with just one click, reducing admin time and providing a joined up, seamless experience for clients.

UK | India | North America | Asia-Pacific | Europe

Leading employee-owned law firm, Talbots needed support with their continued growth. They sought a partner to help develop a solution to streamline communication between their Case Management System (CMS) and various external systems. Xperate developed and deployed a custom bi-directional integration, enabling seamless data exchange between their CMS and their partners. This solution improved onboarding and ensures that critical information is automatically updated.

Xperate assisted Masson Glennie LLP on a transformative journey to optimise their operational efficiency. Leveraging the untapped potential within their case management system and building some custom integrations, we were able to develop new systems that transformed the way the successful law firm operated. For this project, our Senior Solutions Consultant spent time each week in the law firm to immerse in their culture and processes, in order to build an understanding of how tech can support them.

City law firm, Peters & Peters invested in a 'best of breed' expense reporting and invoice processing system, Chrome River. However, they ran into frustrations when it did not integrate with their long-established practice and case management system. Xperate created an integration between P4W and Chrome River that ensures all the anticipated benefits are fully realised. The bespoke integration is automatic, quick, reliable, secure and accurate, cutting down administration time and improving speed of invoicing.
